## **EXECUTIVE PROFILE**

CHRISTOPHER WISSEMAN

**CHIEF OPERATING OFFICER**

DEEPWATER WIND HOLDINGS, LLC

Mr. Wissemann is Chief Operating Officer of Deepwater Wind Holdings. He manages Deepwater Wind's technical operations along with planning strategy and development. Mr. Wissemann founded one of Deepwater Wind's predecessors after a career in alternative and renewable energy that spanned 25 years including positions ranging from engineering to business development to chief operating officer. His career in energy has included positions at companies from entrepreneurial start-ups to Fortune 500 firms, including Turner Construction, Energy Investment, Enron, and Northern Power Systems.

Mr. Wissemann's focus has been on non-traditional power development - from solar and wind to cogeneration and Independent power production. He is conversant in technical aspects of power generation technologies as well as economics, permitting, and finance. He has particularly focused on conforming implementation and contract structures of non-traditional power projects to fit within traditional project finance standards. He has negotiated and implemented dozens of long term contracts with utilities and customers - both for power generation and efficiency-derived capacity.

Mr. Wissemann earned his Bachelor's Degree in Energy Studies from Brown University.
